AND MANY MORE

Dear valued customers and stake holders,

While we bid farewell to a very successful, engaging and constructive 20 years of Web Trading Concern Pvt. Ltd., we also welcome a new decade with lot of enthusiasm, clear strategy and dedication on serving our clients with compassion.

I take this opportunity to thank our beloved customers whose continuous trust & confidence in our products and service has made us reach such milestone. We aspire to be one of the best service providing company for medical, lab and health equipment, biomedical waste management systems, Hi-Tech laundry and hygienic solutions giving you the best of the best from multinationals. We believe our aspiration has made us work harder till date and will surely make us more focus on providing best products with world-class service.

I seek continued patronage, cooperation and best-wishes from all our beloved customers, employees and stake holders in return with the promise of excellent service with best products to look after in coming days.

Ventilator

NIHON KOHDEN

Becoming a global leader of medical solutions

Every year Nihon Kohden is expanding its global network, from research and development to manufacturing, sales, and service, in order to fulfill its mission to save lives with the most advanced medical technology.

Nihon Kohden began its overseas expansion with Nihon Kohden America in 1979. The company now has the sales subsidiaries in the US, Mexico, Colombia, Brazil, Germany, France, Spain, Italy, the UK, China, Singapore, Thailand, Malaysia, India, UAE and Korea.

NIHON KOHDEN

Treasure Every Breath®

Nihon Kohden's overriding philosophy inherent to the NKV-550 design is to Treasure Every Breath®. Our focus is to provide clinically relevant innovations and solutions for patients requiring mechanical ventilation.

Seamless Care

With the NKV-550, patients can be transitioned seamlessly between invasive and non-invasive ventilation and high flow oxygen therapy, and is designed for use with all patient sizes.

Lung Protection

The NKV-550 is created on the lung protective approach to ventilation and features the Gentle Lung® Suite of applications to provide clinically relevant, easy to use tools for the open-lung approach to ventilation.

Protective Control®

Protective Control® provides the clinician a safe, fully functional second user interface to easily implement needed ventilator setting changes when treating patients with contagious diseases or who are undergoing a radiologic procedure while remaining within sight of the clinician.

Connectivity

The NKV-550 can transfer critical patient ventilation data to the hospital information system for charting and/or data analytics purposes.

Workflow Optimization

The NKV-550 offers highly customizable screen configurations enabling the ventilator to fit into your paradigm rather than require you adapting to it. Our App based design provides guided processes to help create a more streamlined, systematic way for clinicians to optimize care of their ventilated patients.

Reduced Cost of Ownership

The NKV-550 requires a simple, low-cost preventative maintenance biannually.

Overview

The NKV-550 Series Ventilator System is a comprehensive neonatal through adult mechanical ventilator. Relying on clinically proven modalities and features, the NKV-550 provides the clinician a highly customizable platform to help improve the outcome of the patients they care for while reducing hospital costs.

Nihon Kohden NKV-550 Ventilator

- Adult, pediatric and neonates (tidal volumes down to 2 ml)
- Comprehensive modes and breath types
- Invasive ventilation, non-invasive ventilation, and high flow oxygen therapy
- Gentle Lung® package for lung protection applications
- Protective Control® for contagious disease applications and radiologic procedure applications
- Airway care apps (inline airway suction app, open airway suction app)
- Built-in SpO₂ and CO₂ monitors
- Nihon Kohden connectivity (bedside and central monitors)
- ...

LED Surgical Lamp

OT light

Bowin Medical Co., Ltd. established by a R&D team with more than 20 years experience and a marketing team with more than 10 years, engage in medical illumination, now we can offer:

- LED Shadowless Surgical Lamp
- Complete Reflector Shadowless Surgical Lamp
- LED Medical Film Viewer.

Bowin
Innovations For Medical Illumination

Hematology Instruments & Reagents

Avantor™ Performance Materials manufactures and markets high-performance chemistries and materials around the world under several renowned brand names, including J.T.Baker®, Macron Fine Chemicals™, Rankerm® and BeneSphera™ brands. Avantor, India manufactures and packages a wide range of Avantor's Macron Fine Chemicals™ brands of salts and solvents at its Panoli Plant. Avantor is ranked amongst the Top 50 companies to work for in India.

Features and Benefits:

- Detailed Flag information with histograms: Detailed flag information never before seen on a 3-part analyzer. The system provides information useful for diagnosis including WBC flag, RBC flag and PLT flag
- Compact Design: Minimum size with the footprint similar to that of a 17 inch laptop, with space saving design that allows internal storage of lyse giving small labs more space.
- Cost Efficient : New technology that eliminates the need for cleanser and rinse, reducing the number of reagents needed while at the same time lowering overall reagent consumption
- Throughput : Higher Throughput at 70 tests per hour
- Micro Sample Volume: Micro sample volume at 9.0ul for whole blood mode with capillary whole blood samples supported, perfect for pediatric samples. Prediluted mode – 20ul sample
- Better Connectivity: WiFi capability provides user an added option for data communication together with bi-directional LIS, USB port and LAN port, barcode reader, printer and keyboard.

Eppendorf offers different lines of lab freezers to meet a variety of needs. Depending on the approach, there are different questions for a ULT freezer selection:

Do you need an upright freezer or a chest freezer?

Do you want a foam- insulated freezer wall enforced by vacuum insulation panels or is foam sufficient?

Which footprint in the lab is sufficient and/ or acceptable?

When choosing an upright freezer, do you need a 3- or 5-compartment instrument?

On which instrument do you rely the most regarding all your valuable samples, the work of years, even decades?

Reliability, sustainability, economics, safety – these are the corner stones for selecting the next freezer.

eppendorf

Liquid, Sample & Cell Handling- Eppendorf

Eppendorf is a leading life science company that develops and sells instruments, consumables, and services for liquid, sample, and cell handling in laboratories worldwide. Its product range includes pipettes and automated pipetting systems, dispensers, centrifuges, mixers, spectrometers, and DNA amplification equipment as well as ultra-low temperature freezers, fermentors, bioreactors, CO₂ incubators, shakers, and cell manipulation systems. Consumables such as pipette tips, test tubes, microtiter plates, and single-use bioreactor vessels complement the range of highest-quality premium products.

Now in Focus: All you need to make your lab even better.

Eliminate the constraints of costly extraction instrumentation with the Direct Amplification Disc.

- Epidemic strain detection
- No extraction required
- Reliable Direct RT-PCR detection
- Test up to 8 samples per run
- Minimal sample processing (kit included)
- Sample type: unformed stool

HUMAN HEALTH
WE CARE

GUANGZHOU IMPROVE MEDICAL INSTRUMENTS CO., LTD (HEREINAFTER REFERRED TO AS "IMPROVE MEDICAL"),

Established in 1996, is a high-tech enterprise which provides relevant technologies, products and services for Clinical Laboratory and Clinical Nursing. In 2009, Improve Medical became a listed company on the Growth Enterprise Board in Shenzhen Stock Exchange. Right now Improve Medical has become the leading enterprise in domestic high-end market and one of the main suppliers for Evacuated Blood Collection System in the world.

Blood Gas and Electrolyte Analyzers

i-Smart 30 PRO

Electrolyte Analyzer – Next Generation

i-Smart 30 PRO

Electrolyte Analyzer – Next Generation

- Measures Na⁺, K⁺, Cl⁻ and Ca²⁺ concentrations with 60 μ L of blood or urine.
- Reports patient results in 35 seconds.
- Maintenance free cartridge and easy to use.
- Upgraded hardware allows stable performance.
- Reliable QC management with L-J chart.
- Operates on battery for max. two hours without being plugged in.

Glucometer

CareSens® N Premier

Blood Glucose Monitoring System

Easy & Integrated Diabetes Care

- Efficient diabetes management with tagging symbols
- Integrated diabetes care with SmartLog™

Specifications

- 0.5 μ L / 5 seconds
- 20-600mg/dL(1.1-33.3mmol/L)
- Hematocrit : 15-65%
- 1,000 test result memory
- 5-50°C(41-122°F)

Features

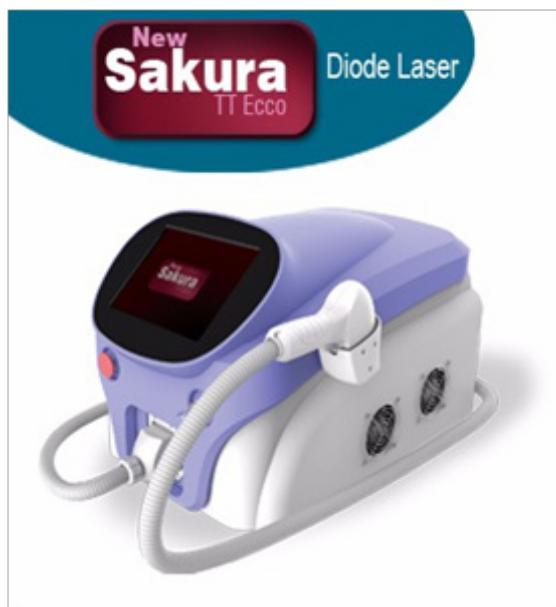

- No coding required
- Hypoglycemia indicator
- Strip expiration date indicator
- Strip ejection button
- Auto back-lighted LCD
- 1, 7, 14, 30, 90-day test averages

- Pre-meal, Post-meal, Fasting and No-mark flagging
- 4 alarms(PP2* and 3-time set alarms)
- *2 hours after meal
- Bluetooth® SMART
- Data port

Asclepion

Asclepion Laser Technologies has been operating for more than 35 years as a leader on the international medical laser scene as manufacturer of advanced laser systems for dermatology, aesthetic medicine and surgery. Based in the Jena Optical Valley, famous throughout the world as the homeland of the German optics industry, the company invests continuously in research and development of new technologies. Today, customers in more than 60 countries trust in the Made in Germany technology of Asclepion and its proven scientific expertise.

BISON

BISON MEDICAL

Founded in 2002, BISON specializes in manufacturing skin and beauty medical equipment, mainly in laser manufacturing, and is a stable and promising global company exporting to more than 60 countries. Especially, as proved by Copper Bromide laser, which is the world's second most developed technology, it has a high level of technology that can extinguish the entire manufacturing process from planning, circuit design & programming, which is the pride of BISON. Our RND Center is constantly researching and developing to introduce new products that can lead the laser market in the future, and plans to launch a variety of products with advanced new technologies. We look forward to the future development of BISON which extends further into the world.

Bio Medical Waste Sterilization System- NEWSTER

Newster Group was established in 1996 focusing on offering environmentally sustainable equipment for the management of hospital waste

In particular, Newster Group is a European leader in manufacturing and marketing of certified patented Frictional Heat Treatment (FHT) systems for the treatment and sterilization of hospital waste.

Newster Group operates worldwide through its main facilities located in:

- Italy – Newster System Srl (Manufacturing facility)
- Republic of San Marino – Newster Technologies Spa (R & D and Sales)

Newster Group has three lines of products:

- NW 5 - NW15 - NW 50 - Sterilization of potentially infectious healthcare waste
- SWT – Safe Water Treatment – Disinfection of potentially infectious hospital waste water
- PURALAB 4.0 - Treatment of laboratory chemical fluid waste

Newster PURALAB 4.0

Production is based on maximum flexibility, co-operation of specialized technicians and electronic experts, directly at the Newster manufacture plant or by workshops of highly oriented professional companies. The whole is completed by technicians who follow-up to service and after sales assistance, operating in different areas, both in Italy and abroad. Technicians are trained directly by Newster, in order to provide better quality service directly on site and satisfy customer's needs. This is all made less difficult because Newster machines are based on easy-to-use technology. Thus, highly skilled personnel is not required for standard maintenance.

LABORATORY FLUID WASTE MANAGEMENT

NEWSTER® PURA CO3MPACT

Newster® PURA CO3MPACT is an on-site machine for the treatment of medical laboratory fluid waste with the aim to remove the biologic hazards (sterilization) and reduce the chemical concentrations of the pollutants from the wastewater before discharging into the sewage system.

NEWSTER® PURA CO3MPACT technology allows to treat laboratory wastewater in order to permit the introduction of the relative liquid component into the public sewer, with an organic and inorganic pollutants removal greater than 90% and a complete removal of biologic hazards.

Thanks to its small size, automatic operations, and the need of minimal maintenance, NEWSTER® PURA CO3MPACT is ideal to be installed inside hospitals and medical laboratories.

The system consists of the following main units:

“Pre-treatment module” equipped with an ozone generator;

“Treatment module”;

Electrical board.

All units are mobile thanks to the wheels placed under each unit.
