About Us

Web Trading Concern Pvt. Ltd. has been dedicated to serving the healthcare sector in Nepal since its establishment in 2001 A.D. We specialize in Diagnostics, Disinfection & Sterilization, Dermatology, and Medical & Critical Care, and are proud to be the core channel partners of over 20 multinational companies from around the world. We have built a reputation for excellence by striving tirelessly to become Nepal's most trusted healthcare provider, offering reliable and fast service while maintaining uncompromising quality.

In recent years, we have expanded our services to cover all seven provinces in Nepal, allowing us to provide better marketing and more reliable after-sales service. We have a highly skilled team of Product Research and Validation, Service Engineers and Technicians who are committed to providing the highest quality service to our clients. We have service stations located in **Kathmandu**, **Biratnagar**, **Pokhara**, and **Chitwan**, ensuring that our clients can access our services easily.

We work hand in hand with our global partners and are committed to quality service which will continue to earn us the trust of our clients, and we look forward to serving Nepal's as well as global healthcare needs for many years to come.

Greetings !

I am delighted to welcome you to a new and exciting chapter at Web Trading Concern Pvt. Ltd. It is a privilege to introduce our company to you and share our journey since our inception in 2001 A.D.

At Web Trading Concern Pvt. Ltd., we are committed to achieving new heights of success every year, working towards our long-term mission and vision. We specialize in serving the innovative Dermatology and Aesthetic Care Equipment, Diagnostics, Disinfection & Sterilization and Medical & Critical Care health sector of Nepal with solutions from top multinational brands across the globe.

Our top priority is delivering high-quality service to our clients while maintaining the reputation of the brands we represent. We take great pride in our products, which inspires us to provide excellent services and deliver value for the money our clients spend.

We understand the unique needs of each of our clients, and our Sales and Service team is committed to providing round-the-clock communication to ensure their satisfaction.

I want to convey my gratitude to our esteemed clients for their ongoing support, my WTC team members for their collaboration, and our principal companies for their confidence. Additionally, I would like to extend my thanks to our supporters and stakeholders who have played a significant role in the development and achievements of Web Trading Concern Pvt. Ltd.

Asclepion Laser Technologies is a leading company in the medical laser market since 1977, with a focus on developing new techniques. The company's innovative approach has won it the TOP 100 award for the most innovative medium-sized companies in Germany. Asclepion's technology and scientific expertise are trusted by customers in over 70 countries. The company has created an innovative offer system to ensure the success of its distributors and physicians, and its service leadership creates positive effects for all customers, partners, and patients.

Bodylab **LOSE FAT & BUILD UP YOUR MUSCLE**

The BodyLab is a body-forming system that uses Focused Magnetic Stimulation (FMS) technology to stimulate muscles with supramaximal contractions, leading to increased metabolism and significant fat reduction. The treatment can target multiple areas of the body and reduce localized fat deposits while also increasing muscle size, definition, and improving posture. The purpose of the supramaximal stimulation is to improve muscle tension and induce a metabolic reaction that stimulates fat reduction, minimizing health risks like type 2 diabetes, high blood pressure, heart disease, stroke, and post-pregnancy problems.

Treatment involves around eight twice-weekly 30 to 45 minute sessions, with at least one further treatment every three to six months recommended for longer-lasting results.

Application:

- Muscle building
- Fat reduction

Technical Specifications:

Technology	: Electromagnetic field
Intensity	: Up to 2.5 T
Frequency	: 1 Hz to 150 Hz
Pulse Duration	: 200 µs to 300 µs
Display	: 10.4" LCD with touchscreen
Dimensions	: 34 cm x 90cm x 67 cm (W x H x D)
Weight	: Approx. 60 kg

MeDiStar **Laser Workstation for Medicine and Aesthetics**

The MeDiStar® boasts an innovative design and incorporates groundbreaking technologies in all aspects, including the mains adapter, cooling system, electronics, display, hand pieces, user guidance, and footswitch. The entire system has been completely redeveloped from scratch, resulting in a 'Made in Germany' innovation that sets a new standard in the industry.

Applications

- Hair removal
- Vascular treatments
- Acne treatment
- Skin tightening
- Skin rejuvenation

How MedioStar works

Technical Specification

- Laser : High power diode, class 4
Power : Max. 5000 W
Wavelength : 760; 810; 940; 1060 nm
Pulse duration: 3 - 400 ms
Frequency : Max. 20 Hz
Modes : Basic, SmoothPulse
Display : 10.1" LCD with touchscreen
Dimensions : 41x71.5x97 cm3
Weight : 65 kg (incl. Trolley)

NanoStar® Y:

The Advanced Q-switched-laser-family On The Market

The NanoStar® Y Nd:YAG laser is a member of the NanoStar® product line, offering two distinct wavelengths (1064 nm and 532 nm) and innovative Q-Switched technology. It is a versatile device that can effectively remove tattoos and pigments while also providing skin rejuvenation treatments.

Applications

- Tattoo removal
- Benign pigmentation removal
- Skin rejuvenation

Technical Specifications

- Laser : Nd:YAG
Wavelength : 532 nm; 1064 nm
Frequency : Max. 10Hz
Pulse duration : 532 nm : 6 ns (QS) 6 ns + 6 ns (OP)
1064 nm : 6 ns (QS), 6 ns + 6 ns (OP), 300 µs (PT)
Max. Fluence : 532 nm: 12.5 J/cm² (QS), 15 J/cm² (OP)
1064 nm: 25 J/cm² (QS), 37.5 J/cm² (OP), 50 J/cm² (PT)
Handpieces : 2 x 2; 3 x 3; 4 x 4 ; 5 x 5 mm² square
Fractional Ø 8 mm (DF) with typical cover rate 3%-10% (depending on wavelength)
Fractional Ø 9 mm (HC) with typical cover rate 20%-40% (depending on wavelength)
Display: 10.4" LCD Touchscreen
Dimensions: 53 cm x 108.1 cm x 110.2 cm (W x D x H)
Weight: Approx. 150 kg

BISON MEDICAL

Founded in 2002, BISON specializes in manufacturing skin and beauty medical equipment, mainly in laser manufacturing, and is a stable and promising global company exporting to more than 60 countries. Especially, as proved by Copper Bromide laser, which is the world's second most developed technology, it has a high level of technology that can extinguish the entire manufacturing process from planning, circuit design & programming, which is the pride of BISON. Our RND Center is constantly researching and developing to introduce new products that can lead the laser market in the future, and plans to launch a variety of products with advanced new technologies. We look forward to the future development of BISON which extends further into the world.

LUCID Q-PTP

LUCID Q-PTP utilizes two wavelengths of 1064nm and 532nm and delivers laser power in a very short period of time as 2 pulses. In order to reduce side effects of high energy, it adopts Q-PTP mode which divides the high energy into two pulses with very short duration. LUCID Q-PTP effectively reduces pigmented lesions on dermis and epidermis and also minimizes the risk of side effects such as hypopigmentation, pigmentation and recurrence of Melasma, comparing to previous laser toning procedures.

MORE-XEL SCANNING

MORE-XEL Scanning is a Fractional CO₂ laser where energy is delivered into the dermis on a small spot of area. This induces collagen formation, to aid continuing skin regeneration. It has various modes, including Scanning, UP, SP, and CW, allowing for both laser and aesthetic treatments. Skin analysis system diagnoses the skin's moisture to provide the most appropriate treatment values for safe and effective treatment.

Fire XEL

Dual Accento

A versatile device that combines the benefits of two advanced laser technologies - 755nm Long pulsed Alexandrite and 1064nm Long pulsed Nd:YAG. The Alexandrite 755nm long pulsed wavelength is highly effective for hair removal and treating pigmented lesions, thanks to its superior melanin absorption properties. On the other hand, the Nd:YAG 1064nm long pulsed wavelength stimulates the dermis layer, rejuvenating the skin and effectively treating vascular lesions. With Dual Accento, you can enjoy a comprehensive range of laser treatments for your skin, from hair removal to skin rejuvenation and more.

Scan to see how
Dual Accento works:

Application

- Skin Rejuvenation
- Vascular lesions
- Hair, wart, nail fungus removal

Technical Specification

Dimension (W*D*H)	: 450(W) * 908(D) * 1240(H) (mm)
Weight	: 120 KG
Weight Including Accessories	: 127 KG
Main Voltage	: 220/230V, 50/60 Hz
Maximum Power Consumption	: 8000 VA
Main Current	: 40A
Safety Class	: Class IV Laser

Aphrodite

This equipment has the newest RF tube and stamp method, and its hand piece can be exchanged for various purposes allowing for both CO₂ fractional laser and ultra-pulsed CO₂ laser procedures. It is an advanced conceptual device for gynecological treatments by stimulating collagen within vaginal mucous membranes, which makes vaginal canal more elastic after the procedure to improve symptoms of urinary incontinence and other lesions in the vagina (vaginitis, vaginal dryness, etc.) by using SUI hand piece (Stress Urinary Incontinence) and VR Handpiece (Vaginal Rejuvenation).

Derma India specializes in Dermatology and Cosmetology field. We offer wide ranges of equipments, devices and systems to meet the demanding needs of the Industry.

As your trusted partner in Dermatology, we ensure that you get the best optimal solution at an competitive price.

Our products are well received by the most prominent Indian Hospitals, leading Dermatologist and Cosmetologist of India

Indications

- Hair removal
- Leg veins
- Benign Pigmented lesions
- Pseudofolliculitis Barbae(PFB) or Razor Bumps

Specifications

Laser Generator Power: 800 W

Laser Type: Semi Conducted laser

Laser Wavelengths: 808 nm

Sapphire size: 12*12 mm

Energy Density: 10~120 j/cm²(continuous adjustable)

Pulse width: 10~1200 ms(Continuous adjustable)

Repetition Frequency: 0.5 ~10 Hz

Cooling way: Sealed inner- circle water cooling system

Treatment Head Temperature: 10~4°C

Sakura Eco TT

NBUVB Comb

Description:

- Supports Advanced onsite calibration system for safe dosimetry.
- Has inbuilt Multi sensor dosimeter with dynamic range angular sensitivity(DRAS) technology.
- Gives different combinations of (UVA & MUVB), upto 48 as per doctor's choice.
- The feature packed software can be used to enter all patient data and treatment schedules, time slot management and prior appointments.
- Talking PUVA is designed in such a way to keep the patients informed about the duration of the treatment and time left for the exposure.
- Dose card system enables the dermatologists to plan the therapy for a particular dose and the course of the treatment.

EXCIM 308-HH

Power Supply: AC220V ± 10%, 50HZ, 10A

External Dimensions: 54*36*44
cm(length*width*height)

Excim 308-HH

Specifications:

- Lamp Type- XeCl Lamp
- Light wavelength: 308 nm
- Spot size: Max 16 cm²
- Work mode: Continuous
- Treatment Time: 1s~40s

MEANINGFUL MEASUREABLE MODERN MEDICAL COSMETICS

The International Year of Crystallography (2014) served as a spark to inspire a new division of dermaindia, Lazhora Medical Cosmetics. To meet with growing demands of the medical cosmetics, We focused on specializing in it. We set up a company with an in house laboratory. The laboratory is equipped with best diagnostic gadgets and is headed by highly qualified scientists.

What is different is that we provide a range of personalized formulations which are tailor made to cater your needs. We take great care of entire lifecycle of the product to ensure we deliver what we promise. This starts right from sourcing of the raw materials from very reputed manufacturers to the packaging of final product which is done with very high standard quality control. We also make sure there is no compromise on the aesthetic appearance of the product.
